Since there are 2 of you you can fly a coxter and a DPS ship. If you go to zero, expect the gate fields much more often due to bubbles and still holo of bored standing fleet pilots. We We in T2 Scrub and go from there? If you have questions about game mechanics send a letter to me ingame. It's 4) away from Jita, so the adaptatons are quick and inexpensive. Could I get someone else's opinion? And remember, prostituting isn't pvp. It's not a good answer to be honest. at zero until you jump into a camp you can get some good kill- ratter, troglodyte gatecampers / just dictors / fleet too safe to deal with ceptors going to scam range with backup 3 jumps away, etc. I don't know. Niarja's been pretty rewarding so far. Fly into hostile space and sit in a novice or small complex, killing the PNGs who show up. I am a player who returns to Eve after 10 years with very little experience in PvP. This is, in my opinion, the best way to learn PvP of any kind. But then again, I don't look at these things from the point of making isk. Look at them before your travels begin. Edit: Good example of current Damm Rhayn gatecamp. You can choose to deform or fight. I don't recommend that Corp to fly with her. (Or does Eve just not deal with non-blob fights?) Thank you. Thank you. Just null pvp is hell, don't do that. Note that we want to be able to keep doing ISK when we can so don't go balls deep at this point will help. I'm trying to find out more information on the best way to get into the PvP side of the game. Also it is very important to find the fight where you have a chance to win. pvp in commercial hubs is , HS in general in FW small sites are fenced so you always know which ship is coming and a bigger fish cant blap you, probably closer to a "honorabru 1v1" next to the pvp abissoard. All this is useless now, because of the cost of war and the abundance of resources. And to be honest, I've already played others. FPS internationally and nothing is more intense than a 1v1 frigg. Do what you want, not what anybody else does. My goth is Tama Low Sec.
